Deep Cell Parabolic

PBL

DIMENSIONS

Dimensions are subject to change. For critical applications, verify all dimensions with factory.

Available in 1x4, 2x2, and 2x4 lengths, 1, 2, 3, and 4 lamp configurations, T8, T5, and BIAx. Nominal 3" deep cell parabolic louver provides optimum performance and efficiency while ensuring a high level of visual comfort. Semi-specular natural anodized aluminum louver is virtually maintenance free. Black reveal louvers hinge from either side and are secured in either the open or the closed position by die formed steel hinges. Mechanical light trap prevents light leaks. All air return functions are optional. Proper lamp positions allow fixture to operate at maximum efficiency with controlled widespread distribution. Available with specular aluminum reflector (87% reflectance) high efficiency white reflector (92% reflectance) or high efficiency specular aluminum reflector (95% reflectance). Metric dimensional housing available.
